

Project Exodus

Living in Exile

Subjects for this project must fit the following criteria:

Nationality: *Malaysian or Ex-Malaysian*

Current Location: *Other than Malaysia*

Hello. I am Melvin Tong. I take pictures. Some of my efforts may be seen at www.mudframes.com

My new project; *Exodus: Living in Exile* is aimed at documenting the lives of the hundreds of thousands of Malaysians currently living and working abroad through their portraits.

Presently, there is an estimated 1 million Malaysians living and working overseas. If you are one of them or know someone who should have been here in Malaysia but calls another country home instead, please contact me.

I and many others in this country like to think that you are still part of us. As a photographer I can bring at least some of you together through your portraits and connect you with us.

The photographs would be exhibited on my website as part of an initiative to celebrate you who are not here.

There is of course, no cost to you for any of this. Other than your time.

What I would like to do is meet you and spend no more than two hours taking your portrait which I shall post on to my website. All I ask is two hours of your time and a few details about you to go with the pictures.

As I'm currently located in Kuala Lumpur, Malaysia, I foresee most of the shoots to be held in Malaysia; unless of course, I happen to chance upon your current location overseas.
